

EXCAVATOR FORESTRY DISC MULCHER

FAST. RELIABLE. HUNGRY.

Reclaim your property.

From contractor to private landowner, Diamond Mowers has the excavator attachments to get the job done.

Excavators perform critical tasks in land clearing and vegetation management. Choosing the right attachment for your excavator is essential.

Heavy-duty is built right in. →

- Using both the perimeter and bottom surface of the disc, this mulcher has the ability to cut clean and quick like a chainsaw, as well as mulch material finely enough for decomposition.
- Reach slopes, waterways, railways and other hard to reach areas that require vegetation management.
- The precision provided by excavators allows you to be selective for full control of the material you choose to remove.

MEET THE CUTTING POWER

Diamond's unique disc design uses both **stored energy** and **hydraulic power** to mulch, making it an energy-efficient and economical choice.

Equipped with **FOUR-POINT HARDENED STEEL TEETH** on the perimeter and bottom of the disc, this disc has all the cutting power it needs! To extend tooth life and enhance productivity, the teeth can easily be sharpened and rotated. Patented planer knives are found at the center of the disc to eliminate any dead zone.

THUMB RECEIVER

- Works with your excavator thumb to function like a grapple
- Can also be used on its own to manipulate and manage downed brush

 *The thumb receiver comes equipped on the 36" Excavator Forestry Disc Mulcher and is an option available for purchase on the 48" Excavator Forestry Disc Mulcher.*

36" DISC MULCHER

- Open front design that exposes the disc to process material quickly
- Steel deflectors with full casing direct material downward after it is mulched

SPECS

| | MATERIAL | FLOW RATING | MAX HEAD WEIGHT | EXCAVATOR SIZE |
|-------------------------------------|------------------------|-------------|-----------------|----------------|
| 36" EXCAVATOR FORESTRY DISC MULCHER | Cuts 6" Mulches 4" | 24-32 GPM | 900 lbs | 6 - 14 MT |
